

LP® SOLIDSTART® LVL CONCRETE FORM BOARD

Designed for Consistent, Even Pours

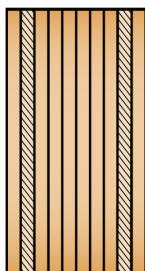

SOLIDSTART®

ENGINEERED WOOD PRODUCTS

LP® SolidStart LVL Concrete Form Board is another smart, engineered alternative to dimension lumber. If consistency, reliability, and installation speed matter, we have the right products for your job. LP LVL Form Board resists cupping and warping so whether it's used for slabs, sidewalks, tilt-up walls, or curbs, you'll have more even and consistent surfaces to work from and a better finished product.

ENGINEERED FOR RELIABILITY

- Consistent, accurate sizes
- Strong, Straight, and Durable
- Resists Warping, Cupping, and Shrinkage
- Multiple reuses
- Lengths up to 60 feet

INNOVATIVE LVL SOLUTIONS

Most LVL products used for concrete forming use veneers that are all oriented in the long direction of the board. This makes wider panels more prone to cupping and deformation when one side is exposed to moisture. LP LVL Form Board is engineered to resist cupping by placing

the second ply in from each face perpendicular to the length of the board. This helps balance the natural tendencies of wood to move under changes in moisture content. The bottom line for you is flatter pieces with longer useable life.

AN ENVIRONMENTALLY SENSIBLE CHOICE

Our process utilizes every bit of the fast growing species of trees we choose. A considerably higher percentage of each log ends up in the final product when that product is laminated veneer lumber than when it is a lumber product. Our higher recovery means less wood fiber is required to meet the same need as with solid lumber. And, at LP if the wood fiber isn't used in the finished LP LVL Form Board it's used to help create the heat and energy for the production process itself. Nothing goes to waste. And, all LP wood-based products use SFI-certified wood.

LP SolidStart Concrete Form Board	PRODUCT	THICKNESSES	DEPTHS	LENGTHS
	LVL	1-1/4"	3-1/2", 5-1/2", 7-1/4", 9-1/2", 11-7/8", 14", 16", 18" and larger	Up to 60'
Other thicknesses and depths available to meet your needs.
